TERMINAL REPORT LGU FEEDING PROGRAM IMPLEMENTATION

School Beneficiary: **Landahan Elementary School**

School Year: 2025–2026

Program Duration: November 2025 – March 2026

I. INTRODUCTION

The Landahan Elementary School implemented the Local Government Unit (LGU) Feeding Program in partnership with the City Government of Toledo, Cebu. The program aimed to address malnutrition among learners, improve school attendance, and enhance classroom participation through the provision of nutritious meals.

Each week, the school received 15 kilograms of lean pork and 10 kilograms of dressed chicken. The designated drop-off point for all meat supplies was Ibo Elementary School, where the Feeding Coordinator was tasked to collect and transport the allocated meat for Landahan Elementary School. These were equitably distributed among grade levels and prepared into healthy meals by teacher-advisers with the assistance of learners' parents. The distributed meat was shared among all learners, ensuring that even those who were not identified as School-Based Feeding Program (SBFP) beneficiaries were able to partake in the nutritious meals. Additional ingredients were sourced through voluntary class contributions.

II. IMPLEMENTATION DETAILS

The feeding program was conducted weekly from November 2025 to March 2026, covering a total of 216 learners. This program was not limited to identified beneficiaries but also included non-beneficiary learners, making it a highly inclusive initiative as all **216 learners** were served. Meals were prepared per grade level, ensuring equal distribution of resources. The school ensured that every learner received a fair share of the prepared meals to promote inclusivity and equitable access to nutrition. Teacher-advisers supervised food preparation, while parents actively participated in cooking and serving.

Menus were varied weekly to maintain learner interest and ensure balanced nutrition. The program also encouraged community involvement through class-based contributions for additional ingredients.

III. NARRATIVE OF ACTIVITIES

Week 1 (November 26, 2025)

The distribution of meat supplies has officially commenced at Ibo Elementary School as part of the feeding program initiative of the Local Government Unit (LGU) of Toledo City, marking another important step in promoting the health and well-being of learners by ensuring access to nutritious food, which will be prepared and served to support the school's feeding program, benefiting all learners while encouraging improved attendance and active participation.

Week 2 (December 1, 2025)

Improved coordination among teachers and parents was observed during the second week. A different menu was introduced to maintain learner interest and ensure nutritional variety. Attendance among beneficiaries continued to improve gradually. Learners were more attentive during class discussions and activities. The feeding activity contributed to a more positive and engaging learning environment.

Week 3 (December 9, 2025)

Nutritious meals were served as scheduled, aligned with the program's objectives. Due to its proximity to the school's Christmas Party, the delivered meat supplies were utilized by each class as an additional dish for their celebrations. This initiative promoted camaraderie, sharing, and inclusivity among learners. Attendance and participation were notably high during this period. The festive atmosphere further enhanced learner engagement and school involvement.

Week 5 (January 12, 2026):

Following the holiday break, feeding activities resumed successfully. Attendance significantly improved compared to baseline levels. Learners returned to school with renewed enthusiasm and motivation. Meals were prepared efficiently with continued parental support. Participation in classroom activities also increased noticeably.

Week 6 (January 19, 2026):

Balanced meals continued to be served consistently across all grade levels. Teacher-advisers ensured proper supervision of food preparation and distribution. Learners maintained improved attentiveness during lessons. Attendance remained stable and consistent. The feeding program continued to support learners' nutritional and academic needs.

Week 7 (January 26, 2026):

Menu variation was sustained to prevent monotony and maintain learner interest. Parents and teachers collaborated effectively meal preparation. Learners showed eagerness attend school and participate in activities. Attendance remained high across grade levels. The program reinforced positive eating habits among learners.

Week 10 (February 18, 2026):

The feeding program demonstrated sustainability and effective coordination. Teacher-advisers maintained proper supervision of meal preparation. Learners remained actively engaged in both feeding and academic activities. Attendance levels were consistently high. The program contributed to a supportive learning environment.

Week 11 (February 24, 2026):

A new menu was introduced to promote healthy eating habits. Learners exhibited positive behavioral changes, including increased responsiveness. Parent participation remained strong and reliable. Attendance continued to be consistent across all grade levels. The feeding activity further enhanced learner well-being.

Week 12 (March 3, 2026):

Feeding activities were conducted as scheduled with continued cooperation from stakeholders. Learners maintained their interest in the program. Attendance remained high and consistent. Classroom participation was observed to be active and sustained. The program continued to support learners' nutritional needs.

Week 13 (March 5, 2026):

An additional feeding day was implemented to provide further nutritional support. This initiative benefited more learners and reinforced the program's objectives. Attendance showed continued improvement. Learners remained actively engaged in classroom activities. The additional feeding day strengthened the program's impact.

Week 14 (March 10, 2026):

Efficiency in meal preparation and distribution improved further. Teacher-advisers and parents worked collaboratively to ensure smooth implementation. Learners demonstrated consistent attendance and participation. Energy levels remained high during classroom activities. The program maintained its positive outcomes.

Week 15 (March 17, 2026):

A double feeding activity was conducted to maximize available resources. Learners benefited from increased food provision. Attendance and participation remained high. Parents continued to provide strong support. The program further reinforced learners' nutritional well-being.

Week 16 (March 17, 2026):

The final week marked the successful culmination of the feeding program. Learners continued to demonstrate high attendance and active participation. Nutritional improvements were evident among beneficiaries. Stakeholder collaboration remained strong until the end of implementation. The program concluded with positive outcomes in attendance, participation, and overall learner well-being.

IV. RESULTS AND FINDINGS

A. Attendance

There was a noticeable improvement in school attendance during the program's implementation. Learners demonstrated more consistent presence in class, indicating increased engagement and reduced absenteeism compared to the pre-implementation period. This positive change can be attributed to the feeding program provided through the support of the LGU, which helped encourage regular school attendance.

B. Nutritional Status

Improvements were observed in learners' nutritional condition throughout the program. Cases of severe and moderate wasting declined, while a greater number of learners were assessed to be within normal nutritional status, reflecting the positive impact of the LGU-supported feeding program on their overall health and well-being.

C. Participation

Learner participation showed significant development, shifting from moderate to a higher level of engagement. Teachers observed increased energy and attentiveness among learners, while both parents and school personnel became more actively involved and consistent in supporting program activities. These improvements are likewise attributed to the LGU feeding program, which contributed to better learner health, motivation, and classroom performance.

VI. CONCLUSION

The LGU Feeding Program significantly contributed to the holistic development of learners at Landahan Elementary School. It improved attendance, enhanced participation, and positively impacted learners' nutritional status. The strong collaboration among stakeholders ensured the program's success.

VII. RECOMMENDATIONS

Sustain the feeding program through continued LGU support by ensuring its regular and uninterrupted implementation in the school. It is recommended that the Local Government Unit maintain and, if possible, increase its allocation of resources for the program to guarantee the consistent provision of nutritious meals for learners. Strengthened collaboration between the LGU, school administration, and stakeholders should also be established to improve monitoring, efficiency, and responsiveness to the needs of the beneficiaries. Continuous evaluation of the program should

likewise be conducted to assess its impact on learners' attendance, nutritional status, and participation, ensuring that the gains achieved are sustained and further enhanced over time.

The school also extends its sincere gratitude to the City Local Government of Toledo under the leadership of Mayor Marjorie Perales for its invaluable support and commitment in implementing this feeding program, which has greatly contributed to the improved well-being, attendance, and learning participation of the learners.
